We wanted to share with you the thank you note we received from one of the Future Fellows we supported at the 2019 AMDA conference. This continues to be a well received program and experience for Fellows and new nurse practitioners who attend. Please consider making a donation to support a 2020 Futures Fellow.

"My name is Shaista Ahmed, and I am one of the recipients of the Futures Fellowship Program this year.

I would like to show my gratitude for the consideration given in sponsoring me for this Program. I deeply appreciate the efforts put in funding this project that has enabled me to see and experience long-term care in a totally new light.

The Futures Fellows whole day work shop was an enlightening experience that taught me the challenges and rewards of joining this amazing field of healthcare providers who, in my opinion, deal with the most vulnerable group of patients with limited resources at their disposal. I met several experts of the field and was drawn to their dedication and enthusiasm for the future of PALTC. It has inspired and motivated me to be cognizant of the special needs of this patient population when I embark on my journey as a geriatric consultant in the Johns Hopkins Bayview ED, where I will see patients from diverse care setting including nursing homes.

I am currently involved in a project studying communication between health care providers and nursing home staff, and I plan to incorporate the principles learned from the meeting and the other PLTC membership resources in my project. I also hope to continue to work on the communication gaps among healthcare providers in diverse care delivery setting that were addressed in several presentations to help improve the transitions of care for older frail patients.

I would like you to know that your support is helping myself and others reach their potential and make a difference in the world. Once again, I want to thank all the members of MMDA who have supported me, and hope to follow in their footsteps and support the Futures Program myself.

I want to end this with the quotation from Sir William Osler,

"To each one of you the practice of medicine will be very much as you make it - to one a worry, a care, a perpetual annoyance; to another, a daily joy and a life of as much happiness and usefulness as can well fall to the lot of man." It is experiences like this that keep us in the latter."
